Contactless Payment
Fast, safe & convenient.

Dear Valued Customer,

Cashless society is the way forward with more customers preferring to make payments using credit or debit cards with just one tap. With the many benefits of going cashless, now's the best time to encourage your customers to opt for this payment solution!

How it works

Step 1

Do enquire if your customer would like to pay with a contactless card.

Step 2

Guide your customer to tap their card on the terminal (the 6-digit PIN is required for transactions above RM250).

Step 3

Remove card after the beeping sound.

Benefits

Spend less time paying with cash and standing in long queues.

Contactless cards are as secure as any other chip card and carry the same multiple layers of security.

One tap is all you need. A convenient payment method for your busy lifestyle.
