Re-opening of 30-year GII 11/49 prints BTC of 2.328x

There were no WI trades with the tightest quote seen at 3.78/72. This auction saw average bidding metrics well above the 2.0x handle i.e. BTC ratio of 2.328x; totaling RM6.7b. The 4th bond auction for 2020 however failed to match its previous equivalent 30Y issuance in May last year which notched a BTC ratio of 3.298x with bids totaling RM6.60b. The auction size of RM2.5b + RM1.5b (Private placement) was slightly larger than our expectations but on track in terms of YTD run-rate of RM14.0b for total issuances. The summary of tender results are as follows:-

Bid to Cover : 2.328x
 High : 3.792%
 Average : 3.78%
 Low : 3.747%
 Cut off : 66.67 %

Real money investors were still evident despite the sizeable Private Placement exercise; denoting decent appetite for this duration...

The tail of a 4.5bps for this tenure was expected and reflects decent investor interest consisting predominantly of large local institutions. The average yield at 3.78% is lower than the previous reopening of 30Y GII11/49 @ 4.64%. Yield-wise, this bond does currently exhibit rather rich valuations compared to the conventional equivalent i.e. 30Y benchmark MGS 748 which was last done at 3.775%. (Note: the historical mean spread between both Islamic and conventional 30Y benchmarks ~3bps). Up next in the auction calendar is the reopening of 10Y MGS 8/29 with a forecasted auction size of RM3.0b.
