Fixed Income : Auction Calendar

Re-opening of 15-year MGS 4/37 prints BTC of 2.211x

Post-announcement, WI opened at 4.68/55% and tightened to 4.66/58%. About RM80m worth of trades were reportedly done between 4.62-59% levels; before closing at 4.58/565% levels. This auction saw total submission of bids amounting to RM6.42b, lower than the RM18.16b seen for the recent 3Y MGS auction. The BTC ratio for this exercise however notched 2.211x which was higher than its last similar auction exercise held in March 2022 (BTC ratio: 1.986x, total bids: RM5.96b). The total offering of RM5.5b was higher than our earlier forecast but within sight of our YTD issuance size of RM77.5b. Summary of tender results were:

Bid to Cover: 2.211x

High: 4.618%

Average: 4.599%

Low: 4.565%

Cut-off: 4.55%

This 15Y MGS auction which is favored by insurance companies and pension-funds, notched respectable bidding metrics resulting in fair valuation versus its Islamic equivalent; but remains a relative value proposition at this juncture...

The tail of 1.9bps was expected with participation seen mainly from pension funds, insurance companies and also offshore financial institutions. The yield offered for the bond at 4.599% is ~54bps significantly higher than its last auction which averaged 4.064% in March 2022. This benchmark is **perceived to be fairly valued** when compared to the 15Y Islamic benchmark equivalent GII 7/36 which was last done at 4.615% levels (Note: the historical annualized mean spread between the Islamic and conventional 15Y benchmarks unadjusted for duration is almost 'parish'). Nevertheless, duration-wise, the 15Y sector is seen to reflect value relative to the 10Y and 20Y at this juncture. Up next on the calendar is the re-opening of 5Y GII 9/27 with our projected issuance size of RM4.0b.

MGS/GII issuance pipeline in 2022														
No	Stock	Tenure (yrs)	Tender Month	Quarter	Tender Date	Projected Issuance Size (RM mil)	Actual Auction Issuance (RM mil)	Actual Private Placement	Total Issuance YTD	BTC (times)	Low	Average	High	Cut-off
