#### Re-opening of 3-year GII 10/25 prints BTC of 4.205x

Post-announcement, WI opened wide at 3.90/3.80% and subsequently drifted lower and traded at ~3.83-82% levels with amounts circa ~RM100m transacted. Eventually bidders brought levels down to 3.82%, with no offers in sight just before closing. This final auction for 2023 saw the highest total submission of bids @ RM16.82b; resulting in a whopping BTC ratio of 4.205x and way stronger than its earlier equivalent auction recently in September (total bids of RM9.18b and a BTC ratio of 1.836x). The total offering of RM4.0b was lower than our forecast, with total issuances for the year pegged at RM171.5b. Summary of tender results were:

Bid to Cover: 4.205x

High: 3.815%

Average: 3.808%

Low: 3.785%

Cut-off: 74.50%

***This 3Y GII auction (the final for the year), saw robust participation from inter-bank players, lifers, and asset management companies in anticipation of less-aggressive US rate hikes going forward...***

The short tail of a mere 0.7bps was reflective of solid appetite mainly from banks (which include inter-bank participants), followed by insurance companies and asset management companies. The yield offered for the bond at 3.808% is ~33bps attractively higher than its last equivalent auction which averaged 3.474% in September 2022. **We are positive from a term premium perspective and deem this benchmark to be slightly undervalued at this juncture;** when compared to the 3Y conventional benchmark equivalent MGS 3/25 which was last done at 3.725% levels (Note: the historical annualized mean spreads between the generic Islamic and conventional 3Y benchmarks along with actual benchmarks unadjusted for duration are between 4-6bps).
