Fixed Income: Auction Calendar

Re- issue of 3-year MGS 7/26 prints BTC of 1.691x

Post-announcement, WI opened at 3.53/48% and taken quickly with quotes moving lower to 3.48/44%. Additional trades of circa RM150m were printed between 3.48-45% area before finally closing at 3.47/45% levels on Day 3. This auction saw lowest YTD total submission of bids at RM9.30b but resulted in a decent BTC ratio of 1.691x (almost similar to its earlier equivalent auction in October last year but with a BTC ratio of 1.92x). The total offering consisting of RM5.5b was higher than our forecast. Summary of tender results were:

Bid to Cover: 1.691x High: 3.472% Average: 3.458% Low: 3.438% Cut-off: 10.00%

This 3Y MGS auction saw decent participation; mainly from inter-banks and insurance companies; relative valuation and term structure slightly less compelling at this juncture... The short tail of 1.4bps was reflective of strong demand mainly from inter-bank institutions and insurance companies. The yield offered at 3.458% is ~36bps lower than its last equivalent auction which averaged 3.823% in October 2022. We are NEUTRAL on this bond from both term premium structure and relative value perspective at this juncture as our comparison to the 3Y Islamic benchmark equivalent GII 10/25 which was last done at 3.43% levels provides minimal carry (Note: the historical annualized mean spreads between the generic Islamic and conventional 3Y benchmarks and actual benchmarks unadjusted for duration are between 3-4bps). Up next is the new issuance of 15Y GII 3/38 with our projected gross issuance size of RM5.0b.
