Re-opening of 5-year GII 7/28 prints BTC of 1.813x

Post-announcement, WI opened at 3.70/3.62% and subsequently narrowed to 3.67/64%. Total trades circa RM350m were printed between @ 3.665% and 3.64% levels; before closing tighter yet higher at 3.67/66%. This auction saw decent submission of bids at a RM9.97b, resulting in a BTC ratio of 1.813x when compared to its maiden opening in January (with the highest YTD BTC ratio 3.395x). The total offering of RM5.5b was slightly higher than our forecast. Summary of tender results were:

Bid to Cover: 1.813x

High: 3.691%

Average: 3.677%

Low: 3.657%

Cut-off: 100.00%

This 5Y GII auction saw muted demand arising from the rather large issuance size with participation mainly from inter-bank institutions and AMC's. We opine that there is some relative value being seen in this 5Y GII at this juncture...

The tail of a mere 1.4bps reflected average bidding metrics with demand seen mainly from inter-bank participants, and asset management companies (AMC's). The yield offered at 3.677% is only ~8bps higher compared to its last equivalent auction which notched an average 3.599% in January. **We note the existence of slight relative value, considering that the current spread compared to historical annualized mean spreads between the generic Islamic and conventional 5Y benchmarks (adjusted for duration) is ~4-6bps** (Note: the 5Y conventional benchmark equivalent MGS 4/28 was last done at 3.59% levels). **From a term premium perspective, we are tilted to a slight-bias on 5Y GII compared to 5Y MGS.** Up next is the re-issue of 10Y MGS 11/33 with a projected issuance size of RM4.5b.
