Re-opening of 15-year MGS 4/39 draws strong BTC of 2.672x

Post the tender announcement, WI opened at 4.07/02%. Only RM10m of the WI was traded at 4.01%, and it was quoted at 4.03/00% before the auction cut-off. The auction itself saw good demand, with bids totaling RM8.02bn tendered, resulting in a BTC ratio of 2.672x. The auction cleared at an average yield of 4.015%, with a tail of 1.1bps (previous reopening in July saw it clearing at 3.972%, with a BTC of 3.101x and short tail of 0.3bps). The total offering of RM5.0bn for this reopening auction (which was inclusive of a private placement of RM2.0bn) was in line with our expectations, and bring the total issue size outstanding to RM15.0bn. Summary of the tender results are as follows:

Bid to Cover: 2.672x

High: 4.026%

Average: 4.015%

Low: 3.999%

Cut-off: 50.0%

This 15Y MGS reopening saw good demand, with a strong BTC of 2.672x. Valuation looks fair, both relative to GII and from a term premium perspective

The strong BTC was reflective of the solid demand for the paper, with interest seen from a diverse base of participants, including banks, pension funds and insurers. The historical mean spread between the generic Islamic and conventional 15Y benchmarks over the last year has been around 0.1bps, so at the current 0.3bps, the MGS looks fairly valued from a relative perspective. From a term premium perspective, the 15Y sector of the MGS curve also appears to be fairly valued, with the current generic MGS 10s15s spread at 15.2bps which compares to an average of 15.5bps over the last 12 months. Up next is the reopening auction of the benchmark 5Y GII 7/29 with a projected issuance size of RM4.5b.
