**Re-opening of 10-year GII 11/34 draws moderate BTC of 2.422x**

Post the tender announcement, WI opened at 3.90/87%. The WI saw a total of RM90m being traded between 3.87% and 3.815%, and was quoted at 3.83/82% before the auction cut-off. This auction itself saw moderate interest, with bids totaling RM12.11bn tendered, resulting in a BTC ratio of 2.422x. The auction itself cleared at an average yield of 3.819%, with a tail of 0.8bps (the previous auction of the 10Y benchmark GII 8/33 at the start of the year saw it clearing at 3.908%, a tail of 1.2bps and a BTC of 2.445x). The total offering of RM5.0bn for this reopening sale was slightly more than our projection of RM4.5bn, and brings the total issue size outstanding to RM25.0bn. Summary of the tender results:

Bid to Cover: 2.422x  
 High: 3.827%  
 Average: 3.819%  
 Low: 3.813%  
 Cut-off: 52.38%

***This 10Y GII reopening saw moderate demand, with a decent BTC of 2.422x. Valuations look fair from a relative value angle, and slightly cheap from a term premium perspective***

The tail of 0.8bps and decent BTC was reflective of the moderate demand for the bond, with interest seen from a wide variety of market participants including insurers, banks and asset managers. The historical mean spread between the generic Islamic and conventional 10Y benchmarks over the last year has been around 2.2bps, so at the current 2.3bps differential, valuations look fair from a relative perspective. From a term premium perspective, the 10Y sector of the GII curve looks to be slightly on the cheap side, with the current GII 7s10s spread at 9.6bps which compares to an average of 7.5bps over the last 12 months. The bond takes over from the GII 8/33 as the new benchmark 10Y GII. Up next is the reopening of 15Y benchmark MGS 4/39, with a projected issuance size of RM5.0b.

MGS/GII issuance pipeline in 2024
