Re-opening of 7-year MGS 4/33 prints a moderate BTC of 2.168x

Post-announcement, WI opened at 4.14/04%. Around 100-150m of the WI was traded between 4.04-3.90%, and it was last taken at 3.98% prior to the auction cut off. The auction saw bids totaling RM10.84bn, resulting in a moderate BTC ratio of 2.168x at an average yield of 3.983% with a tail of 1.6bps (the previous re-opening in May cleared at an average yield of 3.580% with a BTC of 2.592x and a short tail of 0.3bps). The total offering of RM5.0bn for this reopening sale matched our expectations, and brings the total issuance size of the bond to RM24.0bn. Summary of tender results are as follows:

Bid to Cover: 2.168x
High: 3.999%
Average: 3.983%
Low: 3.959%
Cut-off: 6.43%

This MGS 4/33 re-opening saw decent demand; looks fair relative to GII and slightly cheap from a term premium perspective

The moderate BTC was reflective of the decent demand for the paper, especially coming after the massive rally over the past two sessions, with interest seen primarily from banks and insurers. The historical mean spread between the generic Islamic and conventional 7Y benchmarks over the last year has been around -3.6bps, so at the current -3.0bps, the MGS looks fairly valued. From a term premium perspective, the 7Y sector looks slightly on the cheap side, with the current MGS 5s7s spread at 16.8bps compared to the average of 15.8bps seen over the last year. Up next is the reopening of the benchmark 30Y GII 1/56, with a projected issuance size of RM5.0bn (auction of RM3.0bn with the balance of RM2.0bn to be privately placed).

MGS/GII issuance pipeline in 2026
