Upcoming Government Bond Tenders Nil

Fixed Income Daily Market Snapshot

US Treasuries

US Treasury yields extended its leg up yesterday, this time across the curve by 2-8bps as the House approved the US Tax Bill, leaving the Senate to be the last hurdle to cross for this year-long battle on tax reforms since President Trump took office. The long end of the curve rose the most, with the 10s and 30s rising 7bps and 8bps respectively to 2.47% and 2.82%, further widening the 5s30s spread to 60bps, from 57bps a day earlier. With the passage of the Tax Bill becoming an increasing certainty, we expect markets to begin shifting their attention to the scheduled release of final 3Q GDP print, just before the start of the year end festive season.

MGS/GII

Trading interests in local govvies regained some traction with total transaction crossing the RM1.0bn mark again, to RM1.03bn yesterday. This time, besides continued interests in the short end MGS 3/18 and 9/18 with combined volume of RM356m, we also noticed substantial interests in MGS 11/27, which saw RM248m changed hands at 3.95% (-1bps). Benchmark yields closed very mixed, with the 30Y losing 1bp while the 3Y shedding 3bps while the belly of the curve comprising 5Y and 7Y saw yields inching slightly up by 1bp. Trading in GII remains tepid with the bulk of the trades on GII 6/33 which closed flat at 4.75%. We expect demand for local govvies to remain supported albeit potentially softer as we head into the year end festive holidays. Malaysia CPI is due today and will reaffirm further moderation in inflation.

PDS/Sukuk

Tracking local govvies, trading in corporate bonds also showed further pick-up. Volumes dealt increased further to RM496m, from RM428m traded a day ago. Interests were quite equally spread between the AAA and AA space while the GG segment continued to see subdued trading, with only PTPTN 3/32 and DanaInfra 3/32 changed hands (RM10m each). Caga 9/20 topped the list with RM140m changed hands at 4.10% and Fortune Premiere debut yielded 4.65% with RM85m dealt. We also continue to see substantial interests in power papers, with SEB 6/18 and SBPC 7/25 and 7/26 leading the pack. We expect selective interest to continue as investors re-assess their portfolios ahead of 2018.

Market/Corporate News: What's Brewing

M101 Holdings Sdn Bhd has appointed China Railway Construction Corp Malaysia Bhd (CRCC) as the main contractor for the development of M101 Skywheel, which has an estimated gross development value of RM2.2bil. In a statement yesterday, the company said M101 Skywheel, a project designed by Studio FA Porsche, is headed for completion by 2021 and well on its way to becoming Malaysia's next iconic landmark. M101 chief executive officer Datuk Seth Yap said that with CRCC's diverse and close to seven decades of experience, M101 was confident that Skywheel is in good hands. The 78storey M101 Skywheel is strategically located in the heart of the Kuala Lumpur City Centre, giving the iconic development an unobscured view of the Kuala Lumpur City skyline. It claims to be the world's first integrated development designed by Studio FA Porsche, first in the world with Sky Ferries Wheel on the 53rd floor with the highest vantage point of 220m above the ground, world's first highest shopping experience with a SkyMall that extends from the 50th to 52nd level with over 200,000 sq ft of retail space and first in Asia with Planet Hollywood Hotel. "M101 is championing property tourism as our core business strategy. Instead of building just another integrated development, we are building a branded development that fits the market's needs and further elevate Malaysia's tourism industry. "We have launched the project in Hong Kong, Taiwan, Indonesia, Singapore, China, Japan, South Korea, the Philippines, Brunei, Sri Lanka, and Bangladesh, and are pleased to announce that it has been very well-received," Yap said. - Bernama (Source: The Star Online)

Malaysian consumer confidence remained stable in the third quarter of 2017 but there remains the nagging worries about the nation's fiscal status, job security and debt, says a Nielsen consumer confidence survey. According to the findings of its Global Survey of Consumer Confidence and Spending Intentions issued on Tuesday, Malaysian consumer confidence dipped one point to 93 percentage points from the second quarter. "Whilst confidence level stayed steady, the nation slipped four spots to be 32nd most confident country globally (28th place in Q2 2017)," it said. Nielsen Malaysia's managing director Raphael Pereda said the latest survey showed confidence levels across Southeast Asia continues to hold strong with four out of six countries in the region retaining their top 10 spot globally. Consumers in the Philippines are the second most confident globally (131 percentage points, +1 from Q2 2017) followed by Indonesia in third place (127 percentage points, +6). Vietnam retained its fifth position from previous quarter (116 percentage points, -1) while Thailand inched up a spot to be the ninth most confident globally (113 percentage points, +6). Singapore improved its ranking by two spots at 29th place as compared to last quarter (94 percentage points, +5). The average global consumer confidence is 105 percentage points (+1 vs. Q2 2017). "The consumer confidence level for Malaysia remains on par with that of the second quarter this year, below the neutral threshold, but still remaining at its highest level for over two years," said Pereda said. "The higher trend in sentiment observed over the last couple of quarters, coupled with the continued improvement in key economic indicators has also led to the first quarter of growth in fast moving consumer goods (FMCG) this year." Malaysian consumers continue to rank the nation's fiscal status (44%, -3% vs. Q2 2017) and job security (21%, -1%) as their top two key concerns whilst 17% of the survey respondents also list debt as the third most worrisome (17%, -1%). Despite positive economic indicators, recessionary sentiments among Malaysians continue to remain high (80%). However, at least one in four respondents are feeling positive that the country will be out of an economic recession in the coming 12 months (27%, compared to 25% in Q2 2017). Malaysian consumers also continue to remain upbeat on their state of personal finances with 56% perceiving that their state of personal finances to be either good or excellent in the next 12 months (+4% compared to last quarter). A total of 45% of the respondents also feel confident about the local employment outlook over the next 12 months (+1% vs. prior quarter). Other key areas of concern that recorded a slight increase compared to the last quarter include work/life balance (17%, up 2% from prior quarter), health (13%, unchanged) and increasing fuel prices (12%, up 4%). "The Malaysian economy continued to show strong signs of positive growth with a GDP of 6.2% in Q3 2017, yet the number one concern for Malaysian consumers remains with the economy. Many still believe they are in a recession, further highlighting that the trickle effect of the improving economy is yet to fully take effect. "Despite the fact that none of the economic KPIs indicate that the country is in a recession, consumers continue to believe that the current situation and the future for the country is not positive," Pereda said. Globally, Southeast Asian consumers retain their lead when it comes to saving intentions, with Filipinos the top savers. The survey showed Filipinos are the world's most avid savers (69%) followed by Indonesians and Thais (68%), tied in second place. Consumers in Singapore (67%, 4th), Vietnam (66%, 6th) and Malaysia (63%, 7th) are all ranked within the list of top 10 when it comes to saving any spare cash after covering essential living expense. The global average of consumers depositing spare cash into savings is 52% (unchanged from last guarter). Besides prioritising saving intentions, nearly one quarter of Malaysian consumers have also said that they would divert any spare cash towards investment of stocks/mutual funds (28% vs. 32% in last quarter) and paying medical insurance premiums (22% vs. 25% in prior quarter) while at least two in five intend to pay off debts, credit cards or loans (41% vs. 42% in Q2 2017). Whilst saving intentions are high among Malaysia consumers, the survey also revealed that Malaysians are ready to spend on holidays/vacations (43%, +1% from last guarter) and new technology products (20%, +1%). Nearly nine in 10 respondents have said that they have changed their spending habits to improve household savings in the past 12 months (87%, +3% from Q2 2017) - this includes spending less on new clothes (63%, +6%), cut down on out-of-home entertainment (58%, +2%) and switching to cheaper grocery brands (52%, +5%). "Nevertheless, should economic conditions improve, at least one-third of Malaysian consumers are expected to continue to save on gas and electricity (34%) and spending less on new clothes (33%). "Whilst many Malaysians want to save for a rainy day, they are generally doing so at the expense of an interest rate which is lower than inflation. Consumers could start spending again but if they do so without first paying off higher interest rate, then they are simply repeating the cycle of spending and increased debt," Pereda said. HLBB may, to the extent permitted by law, buy, sell or hold significantly long or short positions; act as investment and/or commercial bankers; be represented on the board of the issuers; and/or engage in 'market making' of securities mentioned herein. The past performance of financial instruments is not indicative of future results. Whilst every effort is made to ensure that statements of facts made in this report are accurate, all estimates, projections, forecasts, expressions of opinion and other subjective judgments contained in this report are based on assumptions considered to be reasonable as of the date of the document in which they are contained and must not be construed as a representation that the matters referred to therein will occur. Any projections or forecasts mentioned in this report may not be achieved due to multiple risk factors including without limitation market volatility, sector volatility, corporate actions, the unavailability of complete and accurate information. No assurance can be given that any opinion described herein would yield favorable investment results. Recipients who are not market professional or institutional investor customer of HLBB should seek the advice of their independent financial advisor prior to taking any investment decision based on the recommendations in this report.

HLBB may provide hyperlinks to websites of entities mentioned in this report, however the inclusion of a link does not imply that HLBB endorses, recommends or approves any material on the linked page or accessible from it. Such linked websites are accessed entirely at your own risk. HLBB does not accept responsibility whatsoever for any such material, nor for consequences of its use.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation. This report is for the use of the addressees only and may not be redistributed, reproduced or passed on to any other person or published, in part or in whole, for any purpose, without the prior, written consent of HLBB. The manner of distributing this report may be restricted by law or regulation in certain countries. Persons into whose possession this report may come are required to inform themselves about and to observe such restrictions. By accepting this report, a recipient hereof agrees to be bound by the foregoing limitations.
