Upcoming Government Bond Tender

Reopening of RM3.0b + RM1.0b Private Placement of 10Y GII 9/29 on Thursday, 29th August

Fixed Income Daily Market Snapshot

US Treasuries

• US Treasuries ended stronger as bull-flattening mode prevailed throughout Tuesday's session; led by the long-ends. Overall benchmark yields closed a 2-9bps lower across the curve with the UST 2Y at 1.52% and the much-watched 10Y declining by 6 bps to a 3-year low of 1.47% levels. Note that the yield curve is currently inverted. The front-end lagged with 2Y supply coming on stream via \$40b auction that was awarded at 1.516% on a strong BTC ratio of 2.60x. Meanwhile, the Conference Board stated that consumer confidence remains upbeat in August, suggesting confidence and continued spending despite slight cracks elsewhere pertaining to global manufacturing, China's growth, BREXIT and possibility of Germany moving into technical recession. Up next is the issuance of \$41b of 5Y notes tonight.

MGS/GII

 Trading momentum in local govvies continued to maintain some traction as volume notched RM3.68b yesterday. Main interest was again seen in the off-the-run 19's, 21's and also benchmark 3Y bonds. Overall benchmark yields closed mostly unchanged to lower; led by declining IRS levels. The 5Y benchmark MGS 6/24 edged 1bps lower at 3.23% whilst the 10Y MGS 8/29 was rallied 7bps at 3.31%. GII dropped to form ~26% of overall trades. The prospect of a lower global trend towards zero (and possibly even lower) interest rate regime is expected to favour local govvies as comparative yield spreads are seen attractive. Despite the government studying another offer of Samurai bonds from Japan, alternative fund-raising strategies including monetizing the government's asserts or hiving off stakes in GLC's etc may be considered. Meanwhile expect attention to be focused on the upcoming 10Y GII bond auction tomorrow.

Corp Bonds/Sukuk

• Corporate Bonds/Sukuk saw secondary market volume rampup to RM1.09b with interest seen across the GG-AA part of the curve as overall yields continuing to decline. The govt-guaranteed LPPSA saw several 2023-2028 tranches done 1-45bps lower compared to previous-done levels between 3.30-45% levels. PRASA 24-25's saw RM175m in nominal amounts traded a massive ~50bps lower between 3.34-3.37% area. AAA-rated TENAGA 8/38 however edged 2bps higher at 3.87%. The AA-space saw AA-rated energy-related bond i.e. SEB 21-22's close sharply lower on yields between 3.37-42% whilst the 2032 and 2036 tranches closed 0-7bps lower.

Market/Corporate News: What's Brewing

TIME DOTCOM BHD staged a strong financial performance in the second quarter ended June 30, 2019 as its net profit rose by 42.4% to RM92.50mil from RM64.94mil a year ago, underpinned by strong growth in its data business. It announced on Tuesday its revenue increased by 15.8% to RM277.82mil from RM239.85mil a year ago. Earnings per share were 15.85 sen compared with 11.17 sen. "The group recorded a current quarter pre-MFRS 16 consolidated profit before tax of RM97.8mil which is RM29.3mil or 42.8% higher than the consolidated profit recorded in Q2 2018 of RM68.50mil," it said. Time dotCom said the higher profit before tax results were mainly due to higher overall revenue growth in the current quarter on the back of better margins due to improved cost efficiency. There was also lower net allowance for doubtful debts of RM1.4mil vs RM6.9mil a year ago, which included an allowance for doubtful debt of RM5.5mil made for advances given to an associate company in Thailand. It also recorded higher net gain on foreign exchange of RM8.8mil vs RM4.7mil a year ago and higher share of profit from investment in

associates of RM3.3mil versus RM2.8mil. According to notes to the accounts, its data division recorded a 21.3% increase in revenue at RM227.51mil compared with RM187.59mil a year ago while voice showed a 6.8% increase to RM17.62mil from RM16.49mil. Its data centred recorded a 6.8% decline to RM32.23mil and others recorded a 60.4% decline tp RM460,000. For the first half, it net profit rose by 21.7% to RM155.63mil from RM127.88mil in the previous corresponding period. "Higher sales were recorded across all core product segments. All core customer groups also contributed to overall revenue growth, led by wholesale and retail customers. "Pre-tax profit grew 23.5% to RM166.1mil (pre-MFRS 16) from RM134.5mil for the same period of the preceding year. This can be attributed to higher overall revenues, improved cost efficiencies and a higher share of profit from investment in associates," it said. During the first half, its revenue increased by 14.8% to RM540.36mil from RM470.58mil. Commenting on the outlook. Time dotCom said telecommunications industry landscape in Malaysia will remain challenging in 2019 as the market is further liberalised through reforms and potential consolidation of key operators. "The group is of the view that opportunities will arise alongside any change in the industry, and will continue to monitor industry developments closely to leverage on opportunities as and when they arise," it said. The company said it would also continue working with its partners in Thailand and Vietnam to tap the increasing demand for cross border connectivity in the Southeast Asian region. "Access to Southeast Asian markets is still in high demand. In addition to connectivity, we are also assessing opportunities to establish ourselves as a regional data centre player in line with our strategy for business sustainability," said Afzal Abdul Rahim, Time dotCom commander-in-chief. The issuance of Islamic bonds, commonly known as Sukuk, is set to rise six percent to around US\$130 billion this year. It would be a fourth consecutive annual increase amid increased activities in Saudi Arabia and Malaysia, Moody's Investors Service said in a report. "Increased activity in Saudi Arabia and Malaysia helped drive strong issuance of US\$87 billion in the first six months and this reduced funding needs," Vice President — Senior Credit Officer at Moody's, Nitish Bhojnagarwala said. "We, therefore, expect second-half volumes to moderate to around US\$43 billion, though Malaysia and the Gulf Cooperation Council (GCC) countries, particularly Saudi Arabia, will continue issuing regularly," he said in a statement here, today. Governments across the core Islamic finance markets, namely, Malaysia, Indonesia and GCC countries continue to adjust their funding mix, supporting longterm growth in sukuk volumes. The change reflects these countries' cultural affinity with Islamic finance, and their governments' desire to promote Shariah-compliant banking. Rising demand for sukuk from domestic Islamic banks and central bank issuance in the core Islamic finance markets was also supportive. Nitish said new entrants and green sukuk could also stimulate issuance. Hence, Moody's expects some African sovereigns to enter the market, and Egypt set up a Shariah supervisory committee in April to oversee sukuk issuance. While the green sukuk market is in its infancy, issuance is likely to accelerate as efforts to combat climate change gain traction, building on initial green sukuk transactions in Malaysia and Indonesia.. (Source: The Edge)

WCT Holdings Bhd's net profit dropped 47% to RM22.7 million for the second quarter ended June 30, 2019, from RM42.45 million a year earlier amid lower contribution from its engineering and construction division. The construction group's revenue for the quarter declined 33% to RM450.11 million from RM669.9

million in the previous year. For the first half of the financial year, net profit fell 21% to RM63.02 million from RM79.52 million in the preceding year, while revenue was down 20% at RM964.76 million from RM1.21 billion. The engineering and construction division reported lower operating profit of RM71 million for the period, compared with the RM98 million reported in the previous year. "The lower revenue and operating profit recognition are mainly due to some of the existing projects which are nearing completion and the newly secured jobs which are still in early stages of construction." said the group. Meanwhile, the property development segment saw lower operating profit of RM45 million versus RM47 million in the preceding year, which was attributed to the sale of undeveloped lands in 2018. On the other hand, the property investment and management segment saw improvement in performance, reporting operating profit of RM50 million against RM36 million in the previous year, mainly due to improved occupancy level of Paradigm Mall in Johor Bahru and higher rental income from Bukit Tinggi Shopping Mall in Klang. On its prospects, the group said the engineering and construction segment will be supported by its strong order book, with the group to focus on project execution as well as new construction jobs. The property development segment plans to launch new projects, subject to market conditions, catering to the demand for more affordable residential units. In the meantime, the group will continue in its efforts to reduce its unsold properties as well as divesting some of its idle land banks to improve its operating cash flows. WCT said the property investment and management segment will continue to improve occupancy levels and tenancy mix, while also enhancing its investment properties. "The group will continue to embark on its de-gearing initiatives to strengthen its financial position and improve its gearing level. Barring any unforeseen circumstances, the board is of the view that the group will be able to deliver satisfactory financial results in the current financial year," said the group.
