

  
**Bio-Fermented Peel Rejuvenation**

A Bio-Fermented Peel Rejuvenation is a technique used to improve the appearance of the skin on the face or neck.

The Bio-Fermented Peel solution is applied to the skin that penetrates the outer and middle layers of skin, causing it to exfoliate and eventually peel off.

The treatment is used to improve age spots, fine lines and wrinkles, freckles and moderate skin discoloration. It also can be used to smooth rough skin and treat some precancerous skin growths.
