PRODUCT DISCLOSURE SHEET [\(Versi Bahasa Malaysia\)](#)

Kindly read and understand this Product Disclosure Sheet (PDS) before you apply and decide to accept the Term Investment Account-i (TIA-i). Be sure to also read the general terms and conditions (T&Cs).

The information provided is merely general information about the product. The T&Cs indicated in this PDS are tentative and may change at any time. Any changes will be notified to the Investment Account Holder (IAH) beforehand.

PRODUCT NAME: TERM INVESTMENT ACCOUNT-i (TIA-i)

Applicable from 29th May 2025 onwards

BRIEF INFORMATION ON THE PRODUCT

1. What is this product about?

Applicable Shariah Contract	TIA-i is a term investment account based on a profit-sharing contract, which is known as the <i>Mudarabah</i> contract.
Type of Product	The product is classified as an Unrestricted Investment Account (UA). UA refers to a type of investment account where the Investor(s), who is also known as Investment Account Holder ("IAH"), allows the Bank to make the ultimate investment decisions without specifying any restrictions and/or conditions.
Parties Involved	The parties involved will be the IAH (i.e., the capital provider) and the Bank (i.e., the entrepreneur). The Bank, acting as the fund manager, will invest on behalf of the IAH. Under this product, the IAH will not be involved in investment activities.

PRODUCT SUITABILITY

2. Who is this product suitable for?

Type of Customer	<ul style="list-style-type: none"> i. Individual(s); ii. Sole-proprietor(s) (with an Individual CASA/CASA-i)
Investment Objective	Aiming to generate stable and consistent returns over an agreed period of time through low-risk investment.

Note:

The Best and Worst Market scenarios are based on the last 10 years' data from BNM's highest (March 2019) and lowest (March 2022) OPR levels, which are assumed to directly impact returns through the full transfer of OPR increase/decrease to portfolio returns, assuming all other factors remain the same.

The Fund performance report will be made available via the website.

VALUATION

The Bank will perform the valuation of the underlying assets of the Fund in accordance with sound industry practice and consistent with applicable Malaysian Financial Reporting Standards ("MFRS") which will be carried out on a monthly basis.

KEY RISKS

5. What are the key risks associated with this product?

(a) Risk of Capital Loss	The product carries the risk of not recovering the full original investment. To control the risk, the Bank will invest the funds in a diversified portfolio of the Bank's low risk qualified financing assets. The Bank will also use sound investment management techniques. The Bank will do portfolio rebalancing to make sure that assets which no longer comply with the fund's strategies and objectives are rebalanced. Portfolio rebalancing is the process of revising the fractions of a class of assets in a portfolio to maintain the desired level of risk.
(b) Market Risk	Market risk is the possibility for an IAH to experience losses due to factors that affect the entire financial market. This may directly or indirectly impact the performance of the underlying assets. The Bank will monitor and manage market risk exposure using the existing risk management system. This allows the Bank to manage the fund's position effectively within the approved risk framework.
(c) Liquidity Risk	Liquidity risk is the risk that the Bank may be unable to meet short-term redemption demands from IAH. Based on the historical trend of the redemption activities, the Bank will formulate the stress test and establish controls to manage the liquidity risk. Stress testing is a technique used to test the ability of the investment to withstand various possible future financial situations. Any mismatches in the amount of cash being transferred into and out of the portfolio will be analyzed and monitored under the liquidity framework as recommended by BNM. The potential loss arising from the liquidity risk for IAH is that there may be lower returns and possible capital loss.
(d) Credit Risk	This risk may arise when a great amount of the fund's assets goes into default. This will be managed by the Bank through careful selection of diversified qualified asset portfolios and close monitoring of the performance of the selected assets to ensure the investment complies with the fund's strategies and objectives.
(e) Investment Decision Risk	This risk applies if the market movement does not favor the allocation of assets to be invested in. Hence, careful selection and strict governance will be applied by the Bank in the decision-making process.
(f) Regulatory Non-Compliance Risk	Such a situation occurs when the investment fails to follow the investment parameters set by the relevant regulators. The risk will be managed by the Bank according to its overall policies and procedures.
(g) Shariah Non-Compliance Risk	This is a risk that arises from the Bank's failure to comply with the Shariah rules and principles determined by the Bank's Shariah Committee or regulatory councils. The Bank will monitor, with guidance from the Bank's Shariah Committee, to ensure that the investment complies with the Shariah rules and principles.
(h) Country Risk	The political and economic stability of the country may influence the growth and performance of the investment asset.
(i) Industry/Sector Risk	Every industry/sector is exposed to various risk elements. As such, diversification and careful selection of such industry/sector are critical to the Bank in managing such risk.

'You are advised to carefully consider all risk factors before making an investment decision'
